EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Erik Milch on July 7, 2004.

The application has been amended as follows:

IN THE TITLE

Delete "Method and" from title.

2. The following is an examiner's statement of reasons for allowance: New claim 40 incorporates the subject matter of claim 19 which was indicated in the previous Office Action as containing allowable subject matter. Accordingly, claim 40 is allowable. Claim 1 has been amended to include that the haptic feedback is operative to indicate when the distal portion of the elongated member has been translated to an end of a working channel that guides the elongated member. Claim 9 has been amended to include that the second force is operative to indicate when the distal portion of the elongated member has been translated to an end of a working channel that guides the elongated member. Although haptic feedback in the form of a force is provided to the elongated member as it resides in guide slot (74) (analogous to the working channel) in the Barnes ('488) device, the device of Barnes is not operative to indicate when the distal portion of the elongated member has been translated to an end of the guide slot. This

would require a differentiation in feedback (force) immediately before, at or after the guide slot. Barnes fails to teach or suggest such differentiation. Therefore, claims 1 and 9 are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
